

## Speed Sensing Microchip for IoT (Internet of Things)

1. A microchip that directly reads the speed;
2. International Patent: PCT/US13/22590;
3. US patent: 14/655,051;
4. Plug-and-Play packaging;
5. Palm size PCB reads the chip and communicates with a computer.

## Current Efforts on Speed Sensing & IoT

A complete speed sensing function module for IoT of

1. Smart natural gas transportation and metering
2. Wind energy evaluation and generation
3. Unmanned aerial vehicles
4. Sports equipment
